Commercial News – The Run Through from Literature in A Funny Way
By Shomit Sirohi

I. So Actually Europe is Racing Again – with a lot of Dynamics

In fact a Boom in America means good things, and a lot finance and economics is being talked about which also means EU is highly financial and this then is a lot of dynamics – which means Varoufakis comes alive with an empty formalism of some mixed economic advanced Unger and then mixed with that a lot of cultural criticism from Sirohi, which is about the Spaghetti afterall and its culture as High stuff – which then is about in fact ignoring him more and more, because it is utopian for Europe that it has in fact a whole curating thing with in fact Nunes celebrating and Macron celebrating in fact Europe as free from austerity and becoming in fact like a becoming swift dynamic of in fact what is called in his words again – literary infinity.

II. From the previous standpoint again – Crime-rates, crises and far rights as dynamic

In fact then the picture is clear – from a crisis of far right type to a successful Europe and world then.

III. Developing countries India mainly then – a lot of renovation of in fact Infinity, the story of business as Usual and a lot of commerce and culture and even A Spandrel for you – the in fact Arcades project everywhere

So India receives the standard World Bank led development model that is also in fact a great budget and a great plan of financial capitalists and Americanisation which then has with it French philosophy to talk to Sirohi, with Argentine Psychoanalysis to guide him through in fact what is called a sensation – a number of arcades thrown around and financially doing well – a story again after high crime rates and far rights.
